👤 PROFESSIONAL SUMMARY

Experienced Analyst with over 3 years of proven expertise in driving data-informed decision-making and organizational growth. Adept at financial analysis, performance reporting, and business insight generation using tools like Power BI, Excel & SQL. Skilled in cross-functional collaboration, stakeholder management, and streamlining reporting processes to improve operational efficiency. Passionate about transforming complex data into actionable strategies that support leadership and accelerate business outcomes.

📁 WORK EXPERIENCE

Shree Research, *Trading Analyst*

Apr 2026 – Present

- **Cross-Functional Algorithmic Development:** Partnered with software engineering teams to architect high-frequency trading applications, applying SQL and Excel-based analysis of historical market data to translate trend patterns into deployable algorithmic models.
- **Quantitative Strategy Backtesting:** Engineered and backtested quantitative trading strategies by extracting and querying large-scale historical datasets via SQL, modelling scenarios in advanced Excel, and visualizing performance metrics in Power BI dashboards-transitioning data-validated models into live market environments.
- **Operational Cost Optimization:** Spearheaded development of proprietary internal workflow tools- integrated chat, screen sharing, and task management- eliminating reliance on external vendors, and tracked the resulting savings through Excel-based expenditure analysis to significantly reduce annual software costs.

Vardhaman Global Sharecom 🌐, *Equity & Derivatives Trader (Trading Analyst)*

Jan 2023 – Mar 2026

- **Developed and deployed a quantitative, data-driven trading strategy:** Spearheaded a data-driven investment strategy through the advanced use of **Power BI and Excel**. Delivered a consistent **25% annual ROI** while successfully managed the phased scaling of the portfolio from an initial **₹3 Crore** to **₹30 Crore**, managed **₹55 Crore** in active assets.
- **Emphasized Financial Scale and Rapid Deployment:** Initial seed capital of ₹25 Lakhs grew to successful deployment across a **₹100 Crore** fund within seven months of testing, yielding sustained **24%** annual returns.
- Streamlined the data acquisition process by engineering a custom **VBA and SQL** solution. Integrated **automated dashboards** for enhanced visibility, directly resulted in a **₹20 Lacs monthly reduction** in data expenses.
- **Enhanced trading floor efficiency:** Provided comprehensive **Excel and Power BI training** and developed customized spreadsheets to optimize trading workflows.
- Analyzed large numerical datasets using statistical and predictive modeling to drive strategy development. Optimized overall performance by conducting rigorous **A/B testing across two distinct algorithmic trading platforms** to validate strategy effectiveness.

Epic Research 🌐, *Associate Financial Consultant*

Sep 2018 – Aug 2019

- Financial consultant for stock and commodity market traders, utilizing **Power BI dashboards** to understand overall portfolio assessment, asset allocation, and diversification. Recommended targeted investment opportunities and funds to strategically enhance client portfolios
- Developed a **QuickSight dashboard** for continuous ROI tracking, uncovering data-driven insights that optimized financing structures. Successfully **reduced the cost of borrowing capital**, this initiative directly drove a **1% increase in overall ROI** and improved business profitability.
- Advised individuals with investment decisions and models, handled HNI investors and closed the deals.

📁 PROJECTS

DoodhBook 🌐, *Dairy Management App*

May 2026 – Present

- Designed a 10-table relational schema in Supabase (PostgreSQL) to power a **ReactJS** and **Node.js** application, covering shopkeepers, customers, suppliers, transactions, and product pricing with strict foreign key relationships for data integrity.
- Implemented role-based data access for three user types (Shopkeeper, Customer, Supplier), with each role seeing only its own slice of data—reducing data exposure and enforcing row-level business logic.
- Applied statistical tools (mean, mode, and median) on transaction and pricing data to surface actionable summary trends within the app.
- Accelerated full-stack development by utilizing **Claude Code** (Gen AI with MCP)—leveraging natural language prompts to build **ReactJS** components, write **Node.js** data sync logic, generate SQL schemas, and drastically reduce manual debugging time.

Finlatics Financial Markets Experience Program (FMEP) 🌐

Apr 2022 – Jun 2022

- Created, managed & maintained a real-time simulated portfolio which will be assessed by linking it to the real-time BSE 500 INDEX, akin to an Asset Management Company
- Engaged in economy-wide, sector specific and company oriented research and analysis of trading strategies.
- Conducted in-depth research and analysis of two sectors of the Indian economy and finished the assigned research work.

📁 INTERSHIPS

Finviral Business Pvt. Ltd. 🌐, *Equity Analyst*

Nov 2022 – Dec 2022

- Research and monitor macroeconomic, industry, and company specific developments to maintain knowledge of capital markets.
- Utilize data analysis tool to identify opportunities for investment.
- Evaluate the risk involved and make appropriate decisions and prepare the relevant reports.

RBeI, *Finance Intern*

May 2021 – Jul 2021

- Collected and standardized the data for detailed analysis
- Facilitated with 60 MS Excel video lectures for CFA aspirants
- Created various quizzes and practice sheets

SKILLS

Power BI • Advanced MS Excel (Macros, Basic VBA) • SQL • Capital Markets • ETL

EDUCATION

R.A. Podar Institute of Management (FMS, Jaipur)  , *MBA (Service Management)* Nov 2020 – Oct 2022
- 4.96/6 CGPA with Finance and Marketing

Arya College of Engineering & Information Technology  , *B.Tech* Aug 2014 – Jun 2018
- Affiliated to RTU, Kota, 74.1% (with Honors) in Electrical Engineering

Kendriya Vidyalaya No.1  , *Senior Secondary* Mar 2014
- Affiliated to CBSE, 75%
